

# SleepSoft®

## Earplugs for sleeping

### Packaging contents

- Two universal thermoplastic hearing protectors
- Two acoustic soft filters
- Alpine Cleaner
- Plastic carrying case
- Alpine insertion sleeve

### The new sleeping comfort

There is nothing better than starting a new day fresh and well-rested. Unfortunately, about thirty percent of the population is not able to experience this. This group of people is suffering from sleeping issues, because of snoring partners, noise caused by the neighbors, a loud student dorm or traffic noise. Sleep deprivation can lead to health issues and serious fatigue, with the risk of a burn-out. To allow people to have a good night's sleep, Alpine has developed perfect earplugs: the SleepSoft. These earplugs absorb the disruptive ambient noise, but thanks to the special filters, sounds such as the alarm clock can still be heard. The soft material of the earplugs and the soft filter, make the earplugs comfortably all night.

### Revolutionary earplug model

Twenty years of experience have allowed Alpine to develop a revolutionary new earplug model with a noise filter, that filters out disturbing sounds. The extremely well thought-out and extensively tested shape of the earplugs provides a great fit.

### AlpineAcousticFilters™ – Unique filter system

The special AlpineAcousticFilters in de SleepSoft earplugs absorb the noises that prevent you from getting a good night's sleep. Snoring sounds and ambient noise are absorbed, allowing most people to fall asleep more easily and sleep without interruption. The special filters prevent you from being disconnected and the sound of the alarm clock, doorbell, alarm or a crying baby can still be sufficiently heard. SleepSoft earplugs are perfect for at home, in a hotel or at the camp site.

### Extremely comfortable AlpineThermoShape™ material

Because of the unique AlpineThermoShape material, the SleepSoft has a wonderful comfortable fit. This material takes on the shape of the ear, so the earplugs have a perfect fit, and stay in place at all times. The material is an Alpine innovation, hypoallergenic, does not contain any silicones, and causes no allergic reactions.

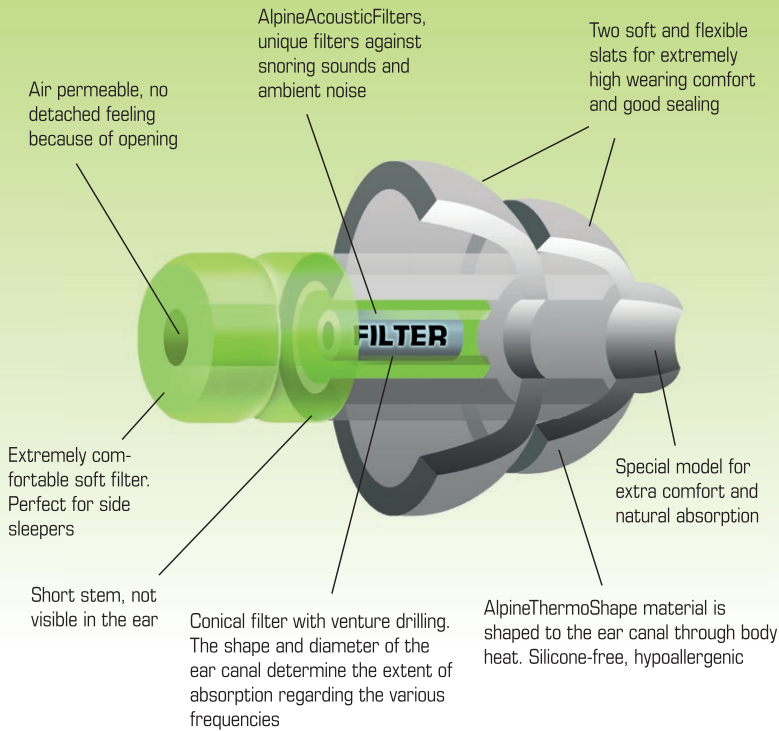

### Soft filters – Extremely comfortable

SleepSoft earplugs come with a unique, soft, comfortable and flexible filter. Together with the Alpine FlyFit, the SleepSoft earplugs are the only earplugs available on the market with these kinds of filters. The soft material of the filter provides extra comfort for side sleepers. And should the earplug be a little too long, the stem can effortlessly be cut to size.

### Alpine Cleaner

Alpine has designed a convenient cleaning tool to help remove earwax from the earplugs. By properly cleaning the earplugs, they retain an optimal effect and will last longer.

# SleepSoft®

## Unique product characteristics

- Protects up to 31 dB
- Extremely comfortable due to soft AlpineThermoShape™ material
- Doorbell, alarm, and alarm clock can still be heard due to unique AlpineAcousticFilters™
- With extremely soft filters, especially designed for (side) sleepers
- Easy to customize, fits in every ear
- Convenient compact carrying case
- With Alpine Cleaner to easily clean the earplugs
- Can be worn all night and prove to give a better sleep
- Also suitable for apnea, snoring during pregnancy
- No silicone
- Reusable

## Winner Red Dot Design Award

Alpine Hearing Protection has won a Red Dot Award 2015 for the design of the SleepSoft. The jury of this prestigious design prize applauded the "high quality and the innovative ability" of the earplugs. The Red Dot Award is considered to be the most valuable award for excellent design. In addition, it is the biggest design competition in the world.

## Dutch Design

The design of the Alpine hearing protectors is an exclusive Dutch Design. All earplugs and filter systems are produced in the Netherlands.

## Alpine Hearing Protection – Consistently innovative

Alpine Nederland B.V. was founded in 1995 and is one of few manufacturers in the world with hearing protection as its core business. We are continuously working on improving our products, in collaboration with end users. Alpine earplugs are sold across the globe in over 40 countries. All Alpine products have been officially tested by independent inspection bodies, and have the CE certification.
